Special Issue Reprint

# Statistical Data Modeling and Machine Learning with Applications, 3rd Edition

**Edited by: Snezhana Gocheva-Ilieva**

This Reprint brings together all the articles accepted and published in the Special Issue "Statistical Data Modeling and Machine Learning with Applications, 3rd Edition" in Mathematics. The collection comprises 23 research papers that span a wide range of areas, including probability and statistical theory and applications, statistical modeling, time-series analysis and forecasting, machine learning (ML) algorithms, hybrid modeling, and applications. We hope that the methodologies and findings presented in this volume will serve as a valuable resource and source of inspiration for scientists working in related fields, doctoral candidates, students, and anyone interested in studying the latest mathematical approaches to modeling complex real-world phenomena.
