The 2024 Special Issue of Inequality in Immunization collates 14 global research and review contributions that spotlight differences in the attainment of immunization coverage across population groups, capturing findings pertaining to various types of immunization (including COVID-19 and childhood immunization). The articles pose key questions about methodological and definitional issues, such as how to standardize and adapt framing to measure zero dose and how to measure the significance of parental hesitancy in exacerbating inequalities. The contributions within this Special Issue range from research studies that are global in scope to analyses focused on national and subnational settings. This collection represents some of the latest state-of-the-art scientific works on inequalities in immunization available in 2024, with contributions from a range of academics, scientists, and implementers involved in networks of and collaboration between the World Health Organization, Gavi, the Vaccine Alliance, as well as the US Centers for Disease Control.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
