This reprint focuses on emerging trials related to pregnancy complications, including new diagnostic approaches for hypertensive disorders, gestational diabetes thresholds, and innovative management strategies for preterm birth and fetal growth restrictions. The reprint also explores advancements in prenatal imaging techniques, screening for congenital anomalies, and molecular studies on placental function. The role of biomarkers in predicting adverse pregnancy outcomes, updates on the management of multiple gestations, and new perspectives on maternal cardiac function in high-risk pregnancies are also discussed. Additionally, this reprint highlights the latest insights on interventions for reducing the risk of pregnancy complications and improving maternal and fetal health.
