Novel Trends in Urban Planning for Building Urban Resilience

www.mdpi.com/books/reprint/10140

Edited by
Steffen Lehmann
Monika Szopinska-Mularz

The purpose of the reprint is to present current research on novel trends in urban planning to build social, economic, and environmental resilience in cities of various scales and densities. The future of humanity is undoubtedly urban. Global disruptions in recent years have changed the thinking about resilient urban planning, including compactness, mixed land use, density, diversity, sustainable transportation, and green space. It is now known that cities must adapt existing knowledge and develop new tools to accommodate a growing number of residents and respond to ever-changing threats, such as climate change, the COVID-19 pandemic, supply chain disruptions and armed conflicts. Threats affect cities of various scales and densities. As urban growth in large metropolitan areas is expected to stabilise or experience a decline, small and medium-sized cities are becoming increasingly important in the regional landscape. This reprint points to new trends in urban planning that arise to address poverty and inequality, mitigate and adapt to climate change, develop resilient urban economies, secure green spaces, and reduce urban health risks.

MDPI Books

Publishing Open Access Books & Series

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
