In order to demonstrate the considerable global impact of textile research and technology, the Publisher, the Editorial Board, and myself have decided to solicit contributions and feature papers from key world-class researchers. These works were collected in a single Special Issue entitled 'New research trends for textiles, a bright future', from September 2022 to May 2023. In total, 18 papers were submitted and 13 were published. These 13 papers can be roughly subdivided into four categories: functional textiles, process and modeling, control, consumers and behavior.
