The following Special Issue (SI), entitled “Human Geography: Interrelationships between People, Place, and the Environment,” represents a significant advancement in human geography scholarship. Comprising 25 contributions, this SI offers a thorough and nuanced examination of the field, blending both foundational ideas and emerging perspectives. Each article provides fresh insights that deepen our understanding of human geography, with a particular focus on the key concepts of people, place, and the environment, as well as the dynamic and interconnected relationships between them. Through these diverse explorations, the SI encourages readers to engage with innovative ways of thinking about spatial and temporal connections, highlighting how human experiences are shaped by complex and interdependent environments. The SI is organized into five thematic sections: migration and population studies, urban and rural development, cultural and social geography, political and economic geography, and environmental and sustainability studies. Collectively, these contributions underscore the international scope of the field and the increasing value of cross-cultural insights, reinforcing the importance of diverse perspectives and methodologies in tackling the spatial and social complexities of contemporary human geography.
