In the last 25 years we have witnessed a change in the approach to rheumatoid arthritis. These changes have made it possible to modify the clinical course and prognosis of the disease, with the subsequent improvement in the quality of life of our patients. This Special Issue explores the most important changes that have occurred in recent years. It starts with an excellent point of view on preclinical arthritis and how we must treat it, considering the window of therapeutic opportunity. Next, because the RA is a condition that predominantly affects women, we discuss the disease through the lens of gender, empathizing the need for this perspective to achieve better research results and personalized medicine. Regarding treatment, the issue takes a journey that begins with the necessity of changing the old paradigm of treatment and the necessity of advancing DMARD lines. We then continue with the anchor drug, methotrexate, and its toxicity then advancing with the real-world persistence of Janus kinase inhibitors, sex differences in response to JAKi and infections related to these drugs. Finally, we examine comorbidities, starting with the Interstitial lung disease, Neutropenia and Felty syndrome and the relevance of radiographic progression. I hope that the issue can be useful for clinicians, rheumatologists, internal medicine specialists, primary care physicians, hematologists, pneumologists, etc. involved in the care of rheumatoid arthritis patients.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
