This reprint of the Special Issue “Urban Ecosystem Services IV” offers a comprehensive exploration of the vital role ecosystem services play in creating sustainable and healthy cities. This collection includes an editorial, eight research articles, and two reviews, providing a multifaceted perspective on the complex interactions between nature and the urban environment. Building upon the groundwork laid by earlier editions in this series, this reprint makes a significant contribution to the ongoing discourse on urban ecology and its crucial link to effective urban planning. By synthesizing innovative research and practical insights, this reprint aims to optimize the delivery of ecosystem services while addressing potential challenges within urban areas. It serves as an important resource for researchers, policymakers, and urban planners seeking to create more resilient and livable cities.
