Francesca Lodato

ISBN 978-3-7258-3409-9 (Hardback)  
ISBN 978-3-7258-3410-5 (PDF)

In recent years, the management of many diseases of the biliary tract and pancreas has undergone great changes due to the rapid progression of diagnostic and therapeutic technologies. For biliary diseases, the constant technological evolution of endoscopic methods such as EUS, ERCP, and cholangioscopy has changed the diagnostic and therapeutic approach and management of many common pathologies, such as biliary lithiasis and its complications. Pancreatology is also constantly evolving, both from a clinical and diagnostic-instrumental point of view, such as in the approach to solid and cystic lesions of the pancreas, due to the increasingly routine use of EUS, both diagnostic and therapeutic, and the new knowledge regarding rarer neoplasms such as neuroendocrine tumors. Beyond that, new technologies based on artificial intelligence are beginning to make their way into gastroenterology. The evaluation of patients with biliopancreatic pathology is becoming increasingly complex and challenging. This reprint presents the latest innovations in the management of pancreatic and biliary tract diseases with the goal of providing the Internal Medicine physician with a state-of-the-art update and insights into the most current innovations.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

## Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

## Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

## High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

## High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

## Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
