Coronavirus disease 2019 (COVID-19) has undeniably led to the worst worldwide healthcare outbreak of the twenty-first century. Our understanding of severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2 virus), the agent that causes COVID-19, has dramatically improved over the past several years. Currently, healthcare systems are facing another COVID-19 outbreak in the form of long COVID or post-COVID-19 syndrome—that is, the development and presence of long-lasting symptoms after an acute SARS-CoV-2 infection. To date, more than 100 potential long-lasting post-COVID symptoms have been attributed to SARS-CoV-2. This Special Issue, which is entitled “Latest Research in Post-COVID (Long-COVID): Pathological and Treatment Studies of Sequelae and Complications” as part of the journal *Biomedicines*, focuses on potential gaps regarding the identification, timeframe, mechanisms, and treatment strategies associated with the management of this post-COVID-19 condition. The issue includes fourteen published papers covering the following topics: (1) treatment of this post-COVID-19 condition; (2) neonatal repercussions of SARS-CoV-2 infection; (3) risk factors of severe COVID-19; (3) phenotyping of post-COVID pain; and (5) other topics.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
