The important processes of plants are influenced by adverse environmental factors, which can have a negative impact on their growth and development. The last decade has seen an increase in the impact of abiotic stresses on plants due to climate changes. The impact of abiotic stress on plants and their defense mechanisms is presented in this Special Issue titled "Molecular Mechanisms Associated with Plant Tolerance upon Abiotic Stress". The studies included in this Special Issue enhance our understanding of how biotic factors affect plants and their defense mechanisms.
