ISBN 978-3-7258-3518-8 (Hardback)
ISBN 978-3-7258-3517-1 (PDF)

“Identification of Plant Metabolites: Characterization and Biological Activities” is a Special Issue aiming to encourage researchers worldwide to discover novel insights concerning metabolites from natural sources, especially focusing on their biological activities. The COVID-19 pandemic represents an important challenge that researchers have faced in their attempt to establish a common communication platform for the latest discoveries in the areas of natural metabolites; however, at the same time, it opened numerous paths for research subjects and collaborations. In this context, the present Special Issue aims to provide a platform for the exchange of ideas, subjects, and discoveries in the field of plant science, with the hopes of providing an excellent opportunity for researchers to offer novel perspectives regarding the characterization of natural metabolites through different separation methods and their corresponding biological activities.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
