Chemical Conservation of Paper-Based Cultural Heritage

Edited by: Yueer Yan , Yi Tang and Yuliang Yang

The Special Issue "Chemical conservation of paper-based cultural heritage" compiles the research achievements in the field of cultural heritage conservation, aiming to deepen the understanding of degradation mechanisms and preservation strategies for paper artifacts and offering practical insights into more efficient and sustainable conservation approaches. This publication serves as a valuable resource for cultural heritage conservation experts, chemists, materials scientists, and general readers with interest in this interdisciplinary domain.
