ISBN 978-3-7258-3727-4 (PDF)

Bioactive natural products can be found among animals, terrestrial or marine microorganisms, herbs, and plants. This Special Issue consists of two reviews and ten research articles; the reviews explored current knowledge on the antimicrobial activity of Latin American plants and the constituents of different *Solanum* members and their pharmacological properties, with some emphasis on their mechanism of action. On the other hand, the research articles consisted of documenting the phytochemistry and the biological activities of plant species such as *Laelia furfuracea*, *Melaleuca quinquenervia*, *Puya chilensis*, *Fluorensia retinophylla*, *Tigridia vanhouttei*, *Kalanchoe fedtschenkoi*, and a new garden rose genotype. Also, an article explores the structure–activity relationship of natural and synthetic derivatives of chalcones and dihydrochalcones against *Saprolegnia*. Other works report the potential of *Lafoensia replicata* as a potential cosmetic preservative and the chemical variation of leaves and pseudobulbs of the Mexican endemic orchid *Prosthechea karwinski*. Due to all the above, the *Bioactivities of Natural Products* Special Issue is a fascinating book that updates or reports knowledge on plants' chemistry and biological activities for the first time.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
