ISBN 978-3-7258-3831-8 (PDF)

When producing food, it is crucial to take into account both the waste generated in the food chain as a result of environmental degradation and the food waste that could be otherwise consumed by members of society. Finding strategies to boost local and regional food production and consumption is also crucial for promoting sustainable availability, food security, and healthy diets. Other objectives include lowering animal illness rates and producing enough high-quality food in adequate amounts with little waste. Taking into account these ideas, this reprint presents 17 papers published by researchers from 16 different countries all over the world, including Brazil, Chile, China, Greece, Hungary, Iceland, Pakistan, Poland, Portugal, Saudi Arabia, Spain, Thailand, Turkey, the UK, Uruguay, and the USA. Due to the added value provided by all the works, the editors believe that this reprint can contribute to the knowledge on nutrition and food security from a global perspective, both for the scientific community and for populations all over the world, and that great steps can be made towards a better future in this context.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

## Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

## Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

## High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

## High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

## Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
