This reprint is derived from the Special Issue "New Studies of Polymer Surfaces and Interfaces" of *Polymers* and contains a total of 10 papers. These papers focus on the application of polymers in the field of enhanced oil recovery (EOR), mainly revealing EOR mechanisms of different types of polymer applications and physical and chemical reactions of the surface/interface. The papers in this reprint are contributed by academics from different countries and universities and they present recent research hotspots and progress related to this topic. This reprint can provide readers with knowledge on good theoretical and experimental methods.
