This Special Issue focuses on recent advancements in the diagnosis and management of skin cancer, encompassing melanocytic tumors, keratinocyte tumors, soft tissue tumors, sarcomas, and others. With skin cancer incidence rising globally, accurate and early diagnoses, along with novel therapeutics, are crucial public health concerns. In alignment with the shift toward precision medicine and with the goal of enhancing knowledge and contributing to improved diagnostic and management approaches for skin cancer, this issue focuses on both technological advancements in detection and advancements in therapeutic approaches to skin cancers, such as newly discovered therapeutic targets, advanced delivery systems, and novel medical devices.
