Antonio Ortega-Pacheco
Matilde Jimenez-Coello

ISBN 978-3-7258-4611-5 (Hardback)
ISBN 978-3-7258-4612-2 (PDF)

Vector-borne and zoonotic diseases in dogs and cats are widely distributed throughout the world; however, their epidemiology and etiology varies depending on the specific climatic conditions, as well as the presence and abundance of vectorial agents. Climatic and ecological changes and globalization are now affecting the distribution and patterns of transmission vectors and, as a consequence, have introduced etiological agents that can potentially affect dogs, cats, and their owners. On the other hand, the patterns of the classical clinical signs of these diseases are changing; thus, their diagnosis may be challenging.

This Special Issue is focused on vector-borne agents and diseases affecting dogs and cats with potential zoonosis and aims to disseminate knowledge on the current status of vector-borne diseases all around the world. For the effective control and prevention of these diseases, a thorough knowledge of the infectious agents, their vectors, and major hosts is required in every ecological region at both the national and regional levels.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
