Territorial space and transportation are closely related to each other. The interaction mechanism and coordinated development of the two are important research directions of academic concern. On the one hand, transportation networks are the skeleton of national and regional development, and the comprehensive transportation system provided by highways, railways, aviation, and water promotes the development of territorial space. On the other hand, the pressure of transportation infrastructure and transportation activities on the protection of territorial space such as ecological and agricultural land is also increasing. The question of how to coordinate the relationship between development and protection, use the network effect of transportation to empower regional development, and improve the environmental impact of the transportation field, thereby enhancing regional sustainability, is a key scientific issue that needs to be studied urgently. In order to promote research in the field of territorial space and transportation coordination, as well as the deep integration of production, study, and research, we have organized a Special Issue titled “Coordinated development of territorial space and transportation” in *Land*. This reprint publication includes 16 articles, encompassing a wide range of critical topics, such as comprehensive transportation network planning, the impact of transportation on land use, the impact of land use on transportation, the interaction between transportation networks and territorial space, and territorial space development guided by transportation.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
