Francisco Badenes-Pérez

ISBN 978-3-7258-4573-6 (Hardback)

ISBN 978-3-7258-4574-3 (PDF)

Within the evolving field of plant–insect interactions, pest management and plant pollination receive a lot of attention because of their implications in crop yield. Host–plant resistance and biological control are important parts aspects of pest management that can bring alternatives to the problems that can arise with insecticide use. This Special Issue presents a collection of papers on the interactions of insects and mites with plants, while highlighting the importance of pest management and pollination.
