Virtual reality, augmented reality, and the metaverse are no longer futuristic concepts—they are reshaping how society works, learns, and interacts.

This Reprint compiles peer-reviewed studies exploring how diverse sectors such as healthcare, education, industry, and tourism are adapting to these immersive technologies. It offers a concise yet comprehensive view of the opportunities, challenges, and ethical considerations surrounding the digital transformation of society.

This Reprint constitutes a significant resource for researchers, professionals, and curious minds interested in the future of human–technology interaction.
