In recent years, the SARS-CoV-2 pandemic and global conflicts have caused major uncertainty in the economy, society, and energy sectors. These events have introduced new and ongoing challenges in transportation. The central question regarding the future of transportation is as follows: Which new trends will emerge? Governments, organizations, and citizens share the common goal of creating cities with less congestion, reduced pollution, increased accessibility, and better infrastructure.

This Special Issue provides a comprehensive examination of these themes, offering critical insights into current advancements and future challenges in transportation. The contributions encompass a range of topics, including the relationship between urban form and movement patterns, the integration of technologies such as electromobility and autonomous vehicles, and the impact of these trends on both regional and global scales. Ultimately, the goal is not just efficient and clean transportation, but a systemic transition that is technologically innovative, politically viable, and socially just. This collection of contributions aims to guide us toward more sustainable, resilient, and equitable future transportation systems that enhance the lives of urban communities.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
