The Reprint entitled “New Insights into Suicide and Mental Health Conditions” gathers cutting-edge research focused on the underlying neurobiology, clinical interventions, and methodological innovations addressing suicide and suicidal behavior in the context of mental health disorders. Suicide remains among the most urgent public-health challenges worldwide, and many individuals who die by suicide have longstanding psychiatric disorders, and yet face limited access to effective interventions. This Reprint highlights contributions that advance our understanding of etiological mechanisms, identify novel therapeutic approaches—including brain-based and neurophysiological interventions—and develop rigorous trial designs for use in high-risk populations. The scope spans pharmacological and non-pharmacological interventions, brain stimulation techniques, digital and biomarker-driven risk prediction, psychometric instrument validation for suicidality screening across diverse settings, and contextual factors shaping implementation of evidence-supported strategies. With an emphasis on bridging translational neuroscience and clinical practice, this compilation aims to accelerate progress in preventing suicidal ideation and behavior and to improve outcomes for individuals affected by severe mental health conditions.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
