ISBN 978-3-7258-6044-9 (PDF)

This reprint of *The Study of Urban Geography and City Planning* consolidates a current cross-section of research published in *Urban Science* on today's uneven and incomplete urbanization. Bringing together fourteen peer-reviewed contributions, it advances dialogue between critical urban social geography and city science while foregrounding equity, resilience, and governance. The portfolio spans programmatic syntheses, comparative case studies, and methodological advances. Reviews map the shift from segregation to fragmentation, examine place attachment in urban settings, and systematize ecological tools to reactivate vacant land. Empirical studies address renaturalization and social cohesion in Spain, state-led community gardening in China, pedestrian network continuity in Panama City, industrial corridors around Cape Town International Airport, retail desertification in Barcelona, links between population and football stadiums in Romania, and complex residential patterns among Southeast Asian Americans in Minneapolis–Saint Paul. Policy-oriented papers explore degrowth-compatible zoning in Texas and non-linear relationships between urban density and municipal spending in the United States. Collectively, this reprint offers rigorous evidence and a critical perspective to inform equitable, resilient, and democratically governed urban futures.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
