Special Issue Reprint

Surface Treatment and Mechanical Properties of Sustainable Pavement Materials

Edited by: Hui Wang , Ge Zhang and Ling Qin

This Reprint focuses on the "Surface Treatment and Mechanical Properties of Sustainable Pavement Materials", a Special Issue of *Coatings* (ISSN 2079-6412) under the section "Surface Characterization, Deposition and Modification". It collects high-quality original research articles and reviews, focusing on the preparation, mechanical properties, durability, and mechanism analysis of sustainable pavement materials such as asphalt and cement-based materials. The Reprint emphasizes the interdisciplinary integration and practical application of related disciplines in pavement engineering, aiming to promote the development and application of eco-friendly pavement materials. With 60817 views, it provides valuable insights for researchers, engineers, and professionals in road engineering and materials science.
