Featured Papers in Inorganic Materials 2025

Edited by: Roberto Nisticò, Eleonora Aneggi, Hicham Idriss and Torben Jensen

Due to the success of the first edition of this Special Issue, entitled " *Featured Papers in Inorganic Materials 2024*", published in 2025, and the high level of interest in this topic, the Editors decided to launch the second edition of this Special Issue, entitled "*Featured Papers in Inorganic Materials 2025*". This edition forms a part of a series aimed at continuing the discussion on recent advancements in the field of functional inorganic materials for a "green" and sustainable future. It places a specific focus on describing the production of inorganic materials following alternative eco-friendly methods, new protocols and strategies for the reuse of inorganic materials, and newly emerging areas of interest involving the sustainable use of inorganic materials.
