Advances in the Diagnosis and Management of Pediatric Diseases

Edited by: Elena Tarca

This reprint of the Special Issue, “Advances in the Diagnosis and Management of Pediatric Diseases”, compiles original research articles, review papers, case reports, and illustrative clinical images that collectively reflect the scope and progress of contemporary pediatric diagnostic research. The contributions address a range of key topics, emphasizing the complexity of pediatric and congenital disorders. The volume highlights the critical role of multimodal diagnostic strategies that integrate thorough clinical assessment with advanced imaging modalities, laboratory biomarkers, and histopathological evaluation. Furthermore, it underscores the importance of individualized therapeutic approaches and the contribution of multidisciplinary, translational research efforts aimed at optimizing clinical outcomes in pediatric populations.
