Special Issue Reprint

Featured Papers in Finance and Society Wellbeing

Edited by: Shuangzhe Liu and Svetlozar (Zari) Rachev

This reprint volume is a tribute to Professors Joseph Mark Gani and Christopher Charles Heyde, whose pioneering contributions shaped the fields of modern probability, statistics, stochastic processes, and financial mathematics. It brings together selected works that reflect their lasting influence on applied mathematics, financial risk, actuarial science, and statistical modelling, while showcasing contemporary advances in stochastic modelling, risk assessment, and data-driven finance inspired by their legacy.
