Bioactive Compounds Derived from Plants and Their Medicinal Potential

Edited by: Maria de Lourdes Pereira, Veeranoot Nissapatorn, Ana Paula Girol and Sónia M. R. Oliveira

This Reprint presents a curated collection of articles from the Special Issue 'Bioactive Compounds Derived from Plants and Their Medicinal Potential' published in *Pharmaceuticals*. It showcases cutting-edge research on the therapeutic potential of plant-derived bioactive compounds, encompassing neuroprotective, anti-inflammatory, anticancer, antimicrobial, and hepatoprotective effects. The Reprint includes *in vitro*, *in vivo*, and *in silico* studies, as well as systematic reviews, providing a comprehensive overview of current advancements in natural product pharmacology. This collection serves as a valuable resource for researchers, clinicians, and students interested in the medicinal applications of plants and the development of novel therapeutics.
