The pioneering work by Nobel Prize Laureates Heeger, MacDiarmid, and Shirakawa marked the birth of conductive polymers, a new family of revolutionary organic materials at the boundaries between classic plastics, metals, and semiconductors. Since then, a host of chemically diverse conducting polymeric structures has been devised with fascinating optical, electrical, magnetic, and redox properties that can be tuned using easy chemical/electrochemical doping. In recent decades, the combination and blend of conductive polymers with other materials families (e.g., carbon nanomaterials, metal nanoparticles or oxide nanostructures, common polymers, and resins) fostered the advent of a new generation of hybrid multifunctional composites with enhanced properties and high potential for present and near-future everyday life applications, ranging from photovoltaics, OLEDs, smart windows and garments, plastic batteries for sensors, and intelligent actuators. In this book, we compile some of the latest advances in the field, covering both old issues and new examples emphasizing emerging applications in biomedical science, healthcare, separation science, and water pollution abatement.

MDPINBOOKS Publishing Open Access Books & Series

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
