Special Issue Reprint

Design and Synthesis of Organic Molecules as Antineoplastic Agents

www.mdpi.com/books/reprint/2637

Edited by
Carla Boga
Gabriele Micheletti

ISBN 978-3-03936-666-8 (Hardback)
ISBN 978-3-03936-667-5 (PDF)

This book is a collection of Special Issue articles with a multidisciplinary character, linking biology, medicine, and synthetic organic chemistry. The synthesis and full characterization of about 180 novel organic species, both of natural and synthetic origin, often designed with the support of in-silico studies, are set out in the book. In several articles, molecular hybridization approaches have been used as a successful multi-target strategy for the design and development of novel antitumor agents. Rigorous and careful biochemical studies ranging from in-vitro experiments on a plethora of human-cancer derived cell lines to in-vivo and ex-vivo studies allowed the authors to identify the molecular targets and gain useful information on structure–activity relationships (SAR). For this reason, this collection should interest many readers from different scientific fields.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
