ISBN 978-3-03936-552-4 (PDF)

The dramatic increase in resistance to antibiotics and disinfectants of foodborne bacterial pathogens has become a serious health problem for consumers and a growing concern for food safety authorities. In this situation, new strategies are being explored that can be employed as useful alternatives in the fight against these pathogens. Natural compounds are considered among the most promising candidates due to their high acceptability and low levels of toxicity, contributing to increased environmental sustainability. Many of these compounds have different bioactive properties and can act as antimicrobials and/or anti-inflammatories, also showing the ability to inhibit the formation of bacterial biofilms. In this book, the invited authors provide evidence that contributes to the visibility of some of these new antibacterial agents, presenting different strategies potentially applicable in the control of various foodborne pathogens.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
