Discovery of Bioactive Ingredients from Natural Products

www.mdpi.com/books/reprint/4395

Edited by
Simona Fabroni
Krystian Marszałek
Aldo Todaro

ISBN 978-3-0365-2106-0 (Hardback)
ISBN 978-3-0365-2105-3 (PDF)

The book includes original research and review articles covering different aspects of the exploitation of bioactive compounds recovered from vegetables and plants as natural ingredients for nutraceutical purposes and for crop protection. Innovative approaches for the extraction of bioactives from different plant species are detailed together with up-to-date methods and results of investigations on the quali-quantitative fingerprint of the obtained extracts. Sustainability of the extraction processes is also considered, with studies focused on the reuse of agri-food industry wastes with a view to a circular economy. Additionally, biotechnological and microbial-based approaches are addressed with studies aiming for the recovery of bioactives from bacterial and fungi microorganisms and using microorganisms to improve the bioactives' extraction performances. In vivo tests and in vitro bioassays to support biological activity of purified compounds, complex extracts and/or combined extracts deriving from different matrices are reported and sustainable strategies for the use of the bioactives for nutraceutical, therapeutic and crop protection applications are also discussed, with particular attention paid to the design of new sustainable drugs.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
