ISBN 978-3-0365-1904-3 (PDF)

The automation of physical and information logistics processes is one of the most challenging developments in logistics but is increasingly necessary in order to adequately deal with the increasing dynamics and uncertainties arising in logistics networks. If the automation of processes in logistics is systematically driven forward today, autonomous logistics systems are even conceivable in the future if the potential of digitalization is exploited. While some companies are already innovating in this area, the majority are still in the early stages of development. This book comprises the articles of a Special Issue on the application areas and potentials of automation in logistics on the path to autonomous logistics systems. The scientific contributions intend to contribute to a lively discourse in practice. The articles cover a broad spectrum of physical and informational automation applications with high practical relevance in individual subareas of logistics (e.g., production and transport) or in connection with the entire logistics network. Topics of IoT applications in intralogistics or holistic approaches of data-driven production logistics as well as autonomous driving or digital twin approaches for intermodal transport chains are covered. The implications for the human factor in logistics networks are also examined, and future research and action areas are identified.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
