The book comprises selected communications on terpenes and terpene derivatives. It clearly demonstrates the sustained interest and importance in this field of natural products; the field connected to secondary metabolites; and renewable resources of plant and animal compounds for medicinal, material, supramolecular, and general chemistry research.

It includes 17 papers, 5 review articles, and 12 research communications with a vast range of topics with different perspectives. It commemorates the great work and legacy of prof. Kenji Mori, and provides important material not only to many chemists but also to specialists in several other fields.
