ISBN 978-3-0365-2946-2 (PDF)

This issue of *Viruses* is a living memorial dedicated to Professor Stefan Kunz, who passed away too early in life, at 54. During his scientific career, Stefan made major contributions to the field of virology. He made seminal contributions to our understanding of how mammarenaviruses gain access to and are trafficked within their target cells. This issue of *Viruses* contains a collection of articles by leading researchers in different areas of virus–host cell interactions and who crossed pathways with Stefan. The topics covered in the issue include novel insights on mammarenavirus cell entry, host innate and adaptive immune responses to infection, recent developments on therapeutics against human pathogenic arenaviruses, as well as mammarenavirus ecology and molecular pathogenesis. The collection of articles is also a reflection of Stefan’s enthusiasm for exploring new ideas and his very collegial attitude reflected by his many collaborations, including the colleagues who have contributed sections to this memorial issue.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
