Aquatic ecosystems and the water they hold have attracted people over the centuries. With the technological development and increasing needs of human society, the attitude to water and aquatic ecosystems has changed. Consequently, biodiversity of freshwater ecosystems has declined dramatically and it is still decreasing. Anthropogenic exploitation of these ecosystems and alterations of their hydrology has largely influenced hydrology-shaped plant communities.

This Special Issue, “Hydrology-Shaped Plant Communities: Diversity and Ecological Function” brings new outcomes about the interactions between hydrological factors and wide spectrum of plant communities. In ecosystems, where human activities directly or indirectly affected the hydrological factors, dependent plant communities have also changed or even disappeared. These plant communities have multiple ecological functions, and one of the most important are the maintenance of water quality and enhancement of local and regional diversity of other biotic communities like diatoms, invertebrates or fish. Thus, detailed knowledge and suitable management of hydrology-shaped plant communities is a prerequisite for their unconstrained ecological functions and high diversity of aquatic ecosystems in the widest sense. The Special Issue consists of ten peer-reviewed papers on plant communities in a variety of ecosystems - from the small kettle-holes in the lowlands of northern Germany to the river Danube - the largest river within the European Union, and from different wetland types in Central Europe to the Dongting Lake – fourth largest lake in China.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
