ISBN 978-3-0365-2985-1 (PDF)

Meat and meat products are in demand worldwide. However, new trends and innovations, driven by consumer interests and demands, have contributed to the development of healthier meat products, which are growing exponentially. Health is one of the main criteria for consumers when choosing the type of food they eat. This, along with more sustainable global production, changes in lifestyles, and nutritional ideologies among the population, has led to a growing demand in the market for healthier and more functional foods.

This Special Issue has collected nine original research articles and one editorial. This book collects all-new, relevant information on the different strategies for modifying meat and meat products to make them healthier and more sustainable and the different quality control methods for their control. With this information, we hope to shed more light on this important topic.

This SI will prove very useful and interesting to all those involved in the meat and meat product industry (livestock producers, processing companies, researchers, scientists, consumers, administration, etc.). Lastly, many of the studies featured in this SI leave the door open to future research in this area of growing interest, not only for the meat and meat product industry but for other foods as well.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
