This special issue of JCM ‘The Prevention and Treatment of Atherosclerosis’ will walk the Readers across novel diagnostic achievements in atherosclerosis and contemporary actions towards optimizing therapy.

Everything begins with diagnosis. Accurate diagnostic tools and tests are of utmost importance. Contemporary research on microparticles, non-coding RNAs, proteomic characterization, ..., offers detailed molecular characteristics of athero-thrombosis.

Prevention is equally important as treatment. The impact of eating habits in prophylaxis of many pathologies, including cardiovascular disease has been documented.

Then new pharmacological agents. Managing hypercholesterolemia with PCSK9 inhibitors, shown great potential in efficient lipid lowering to achieve LDL-C treatment goals, as well as reduction in cardiovascular mortality and morbidity.

However, therapeutic goals accomplishment requires supervision. Arising number of data support that cardiovascular risk prediction can be improved with imaging modalities displaying atheroma: carotid plaque ultrasonography, coronary calcium score, intravascular ultrasonography, and optical coherent tomography or many others.

As atherosclerosis is a progressive disease, it comes the time for more radical management, including endovascular and surgical intervention. There is field for new stent and equipment technologies, new surgical and endovascular techniques, supervision of endovascular procedures with IVUS, OCT, functional flow assessment or cell therapy.

From diagnosis to risk stratification, elaborated prevention models, finally to modern and optimized therapeutic intervention.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
