Blended Learning and Teaching in Higher Education: An International Perspective

Edited by
Maria Beatrice Ligorio
Francesca Amenduni

Blended learning is not a new topic for educational research in Higher Education (HE). However, before the first wave of the Covid-19 pandemic, blended learning was studied by a "niche" of researchers and educators interested in technology integration in teaching and learning. It was not difficult to meet HE professionals who had never or only poorly reflected on the topic of how to integrate digital technology in teaching and learning before March 2020.

All in all, this special issue provides a deeper understanding of what Blended Learning will be in the near feature, encompassing not the simple combination of online and physical presence, but a combination of delivery tools and media used to provide information and to support interaction, a combination of different methods of instruction and teaching/learning, and a combination of learning contexts.

MDPI\Books

Publishing Open Access Books & Series

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access
Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus
Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication
MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility
Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats
MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
