Effects of Plants' Ingredients on Dough and Final Product

www.mdpi.com/books/reprint/5397

Edited by
Silvia Mironeasa

ISBN 978-3-0365-3733-7 (Hardback)
ISBN 978-3-0365-3734-4 (PDF)

The Special Issue presents valuable information on the perspective of using cereals/pseudocereal grains, vegetable byproducts, or flour processed by applying various techniques in baked goods and pasta products. At the same time, this Special Issue reveals the experience of authors regarding the use of plants' ingredients as a valuable strategy to improve the nutritional profile of food products, contributing to the reduction in nutrient deficiencies, or to make products for special nutrition such as low-sodium or gluten-free ones. The quality of the raw materials, the processing techniques, and the potential of certain vegetable byproducts from fruits or oilseeds represent key aspects for obtaining qualitatively enhanced food products. Furthermore, current approaches to diversify the range of bakery and pasta products which offer health benefits to consumers are also presented in this Special Issue.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
