ISBN 978-3-0365-4198-3 (PDF)

Dear colleagues,

This Special Issue aims to publish new and innovative research that could demonstrate the therapeutic potential of natural health products, through relevant *in vitro* and/or *in vivo* biological activities, to prevent or alleviate degenerative diseases. The interaction of natural health products with human microbiota represents an essential aspect, because it could modulate the microbial pattern and alleviate more of a chronic disease's effects in the case of type 2 diabetes, cardiovascular dysfunctions, neurodegenerative diseases, and inflammatory colon pathologies. Additionally, you are invited to send research based on the effect of different extracts or functional foods used in degenerative pathologies and interactions with human microbiota. We aim to identify new data on *in vitro*/*in vivo* research that could demonstrate the bioavailability of natural compounds and the relationship with antioxidant/antimicrobial capacity. Modulated microbiota aspects are expected to be published based on the interaction with natural compounds, natural sweeteners, or other molecules that influence the colon health status.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
