David Nalin

ISBN 978-3-0365-4239-3 (Hardback)

ISBN 978-3-0365-4240-9 (PDF)

Cholera remains a global threat in the 21st century, chiefly due to the continued lack of adequate resource provision and the political will to ensure a safe potable water supply and sanitary waste disposal for a burgeoning global population. The current Special Issue on cholera provides an overview of the available control measures from the perspectives of bioecology, immunology and vaccinology and treatment. These modalities have the potential to reduce cholera case fatality rates to less than 1% if properly implemented. In this Special Issue on cholera, the current state of the art in science-based control measures is reported on by several of the world's leaders in research on the control of cholera and allied acute watery diarrheal diseases.

Dr. Rita Colwell, Dr. Anwar Huq and colleagues at the University of Maryland and the University of Florida will review the latest information on environmental factors related to the prediction and prevention of cholera. Dr. Jacqueline Dean and Dr. John Clemens contribute an overview of recent insights into the performance of licensed and recommended cholera vaccines. Dr. Jan Holmgren will present an update on cholera immunity and the next generation of cholera vaccines. Dr. David Nalin will discuss cholera treatment options and optimums for the 21st century, and Dr. Richard A. Cash will focus on bringing diarrhea treatment, control, and prevention to the community.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
