ISBN 978-3-0365-4686-5 (PDF)

The available range of ornamental plants (cut flowers, potted plants, perennials, bulbous, woody ornamental plants) is constantly being supplemented with new species and cultivars; thus, new methods for their production are required. The sustainable development of the floriculture industry requires modern and environmentally friendly solutions that can maximize the plant's potential. Therefore, it is necessary to adapt flower production methods to actual conditions and take into account the energy transformation and biological, technical, and organizational advances. This Special Issue is a collection of seven well-written research works covering the current state-of-the-art of ornamental crop production. The main body of the Special Issue gives an interesting coverage of new strategies that can be utilized for plant reproduction, regulating their growth and flowering, adapting production technologies to fit the concept of sustainable development, and optimizing supply chain management. This Special Issue will provide a good reference source for growers, research scientists, and advanced undergraduate students.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
