Polymer Films for Photovoltaic Applications

www.mdpi.com/books/reprint/5810

Edited by

Bożena Jarząbek

ISBN 978-3-0365-4676-6 (Hardback)

ISBN 978-3-0365-4675-9 (PDF)

Reprints of *Polymers* Special Issue entitled "Polymer films for photovoltaic applications", which covers all fields related to polymer films for photovoltaic applications, but special attention will be given to the following aspects:

- The synthesis and suitable modification of polymer structure, to obtain polymer thin films for PV devices;
- The influence of film deposition (thermal vacuum evaporation (TVE), chemical vapor deposition (CVD), spin coating, spray, etc.) on the properties of polymer films;
- The thermo-optical properties of polymer thin films and blends of polymer films, as potential parts of PV systems;
- The influence of doping or protonation of polymer thin films and blend polymer films on their properties;
- Polymer thin films as active layers in PV solar cells—correlation of chemical structure and PV properties;
- BHJ solar cells with polymer blends films—the choice of blend film composition to obtain the best PV parameters.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
