Edited by  
Roman Pfeifer

ISBN 978-3-0365-5139-5 (Hardback)

ISBN 978-3-0365-5140-1 (PDF)

Trauma is still a leading cause of death in patients below 40 years of age. Clinical management of severely injured patients is challenging in all phases of treatment during the clinical course. Numerous factors, such as injury severity, injury pattern, patient characteristics and trauma system, affect the decision-making process in our patients. After the successful initial management of an unstable multiply injured patient, secondary definitive surgeries and reconstructions may have a risk for further systemic complications and the deterioration of the patient's physiology. A "Safe Definitive Surgery" (SDS) concept considers the dynamics of the clinical course (prehospital, operations, complications, etc.) and the patient's physiology. Due to the repeated re-evaluation and assessment of the patient's clinical course, dynamics and adaptation of the treatment strategy, the safe management of polytraumatized patients is possible.

Many unanswered questions still exist and need to be addressed in future studies:

1. Which patients profit by the damage control strategy and which do not?
2. When is it best to start with the definitive fixation of fractures in multiply injured patients?
3. How can one improve the quality of life in polytraumatized patients?
4. What are the strategies in elderly severely injured patients?

With this Special Issue, we would like to stimulate research in the field of polytrauma in order to shed light on the above-mentioned questions

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

## Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

## Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

## High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

## High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

## Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
