ISBN 978-3-0365-5206-4 (PDF)

We are experiencing the fourth industrial revolution, a time of significant change and innovation. Independent studies have their limitations, and multidisciplinary convergence that transcends the boundaries of academic disciplines is indispensable.

This Special Issue on “Biotechnology and Sports Engineering” aims to share the latest research trends and explore future directions for development. In particular, biotechnology and sports engineering are intimately connected; together, they may significantly improve the quality of human life. Knowledge building is not just a matter of linearly adding to previous information, but making more synergistic and complementary choices. Knowledge must be exchanged continuously between disciplines to advance of human health and wellbeing.

I would like to thank all who have contributed to this Special Issue, which would not have been possible without the talent and dedication of many authors, reviewers, and the editorial team of *Applied Sciences*. I hope readers will find this Special Issue informative and useful.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

## Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

## Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

## High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

## High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

## Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
