This includes 17 original research articles and focuses on the knowledge on the effects of dietary antioxidants on host health and performance of production animals, including livestock, poultry and fish. It provides various nutritional approaches to improve antioxidant capacity and benefit host health in animal production. Production animals exposed to air pollution, heavy metals, or other stressful conditions can experience oxidative stress that may suppress animal health, performance, and production, subsequently impacting economic feasibility; hence, maintaining and improving oxidative status, especially through an appropriate nutrition strategy, are essential for normal physiological processes in animals. Promising research results have revealed that the administration of natural or synthetic antioxidants in an animal's diet may be an important strategy to mitigate the negative influence induced by oxidative stress conditions. The Special Issue has been conceived to set out the knowledge on the effects of dietary antioxidants on host health and performance of production animals. It provides various nutritional approaches, mainly including vitamins, plant extracts, trace elements, non-essential amino acids, etc., to improve antioxidant capacity and benefit host health in livestock, poultry and fish. This book will encourage more scientists to move forward on the path to increasing knowledge on the effect of natural or synthetic antioxidants on the growth and health of production animals.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
