ISBN 978-3-0365-5045-9 (PDF)

The risk of physical accident or injury to humans from horses is well understood. Now, there is increasing awareness of negative impacts on the physical and mental wellbeing of horses from living in fundamentally human environments and being subject to human management regimes. The 17 articles in this collection describe horse-related risks to humans and human-related risks to horses across a range of equestrian disciplines, sectors and activities. Not only do the authors take detailed approaches towards describing and calculating risk, they suggest solutions-focussed interventions for reducing the consequence and likelihood of harm to horses and humans in their relations with one another. Together, these important articles provide strategies for maximising the mutual benefits of humans and horses in each other's lives. By considering human, animal and environmental aspects of horse-related risk, this collection provides a foundation for the development of an 'Equestrian One Health' framework to underpin future research into horse-related risks.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
