This Special Issue of *Nutrients* is addressing the topic ‘Nutrition, Diet and Food Allergy’. Globally, food allergy affects 1.5% of adults and 5% of children and this prevalence is increasing in recent decades, representing a public health problem.

Different mechanisms are involved in food allergic diseases with distinctive clinical characteristics: IgE-mediated and non-IgE-mediated phenotypes will be distinguished in the Issue, considering the early recent literature on the prevalence, age of onset, follow-up recommendations and duration of food allergies.

Moreover, the management of these fascinating diseases will be discussed with particular attention on nutritional hazards, risks of allergic reactions to new allergens, problems with missed labelling (precautionary allergen labelling (PAL)). Especially, the dietary restrictions and the re-introduction of allergens lead to a significant burden for affected patients, fear of accidental ingestions and related risk of severe reactions, resulting in a reduced quality of life among patients with food allergies.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
